- 3. Known Problems and Workarounds.....2
- 4. Problems Resolved in Minitab Connect 7.8.1.....2

### 1. New Features in Minitab Connect 7.8.1

- Pareto Chart
  - Users can now create Pareto Charts within Minitab Connect Dashboards.
- Line Plot
  - Users can now create Line Plots within Minitab Connect Dashboards.

### 2. Maintenance Items in Minitab Connect 7.8.1

- Zoom Connector deprecated
- Subscription level rate limits for emails/alerts
  - Once limit is hit, alerts will no longer send emails, but gracefully continue
- Updating the API Key expiration alert
  - Updating the API Key expiration alert to also contain information about the customer subscription. This information should include the following about the Minitab Connect subscription:
    - Minitab Connect Subscription Name
    - Minitab Connect Subscription ID
  - For Real-Time SPC subscriptions, we will still email with the branding from "Minitab Connect" however, the subscription name and subscription ID should be reflective of the Real-Time SPC subscription information.

### 3. Known Problems and Workarounds

#### Item 1

When using the Safari internet browser in combination with having the “Monitor User” role, your session may be logged out unexpectedly. (229698)

WORKAROUND: Use the Chrome or Edge internet browsers with this role.

#### Item 2

When in Preview Mode if there is one categorical slicer on the dashboard with a very high number of levels, any other categorical slicer will not be able to open the dropdown menu until a selection is made on the first slicer.

WORKAROUND: Set a preset in Edit Mode before entering Preview Mode. In this case, all options will still be present on the right-side options pane before entering Preview Mode.

#### Item 3

Occasionally on larger Dashboards with many Views, some of the Views may not load in correctly when opening the Dashboard or during an Auto-Update. New Assets cannot be created using those Views and any Assets associated with them cannot be edited.

WORKAROUND: Open the View in Connect and re-save it (No changes are needed). After that either close and reopen the Dashboard or enable Auto-Update.

### 4. Problems Resolved in Minitab Connect 7.8.1

The following issues are resolved in Minitab Connect 7.8.1

- Custom ID Fields should be correctly handled and generated (187199)
- Vertical Split View should display table views vertically (187161)
- Outlook Connector Issues (187231)
- Linked dropdowns not working with form validation (187217)
- Enhancement to enable deletion of dashboards created by Users removed from Connect (187168)
- Enhanced validation for 'Edit as Text' (227404)
- Enhanced validation for copying records (227409)
