1. New Features in Minitab Connect 7.9.1

2. Maintenance Items in Minitab Connect 7.9.1

- Visual Updates to Dashboards
 - Data pane: the 'Select'/'Add' button (Add a data set) has been replaced with a '+' button
 - Change “Preview” button to “Present”.
 - Updated styling for Dashboard notifications
- Session Management
 - Improved handling of Session Management. When a user’s inactivity duration has exceeded the subscription’s session timeout configuration, we will present the user with a “Lock Screen” that will inform the user of being timed out due to inactivity.
- Azure Blob Storage update
 - The update will include the ability to authenticate with an Account key. It will also include the ability to import data from Azure Blob Storage.
- Deprecate Google Display & Video 360 Connector
- Deprecate Google Search Ads 360 Connector
- Add icon support for Reddit and Pinterest connectors.

3. Known Problems and Workarounds

Item 1

When using the Safari internet browser in combination with having the “Monitor User” role, your session may be logged out unexpectedly. (229698)

WORKAROUND: Use the Chrome or Edge internet browsers with this role.

Item 2

When in Preview Mode if there is one categorical slicer on the dashboard with a very high number of levels, any other categorical slicer will not be able to open the dropdown menu until a selection is made on the first slicer.

WORKAROUND: Set a preset in Edit Mode before entering Preview Mode. In this case, all options will still be present on the right-side options pane before entering Preview Mode.

Item 3

Occasionally on larger Dashboards with many Views, some of the Views may not load in correctly when opening the Dashboard or during an Auto-Update. New Assets cannot be created using those Views and any Assets associated with them cannot be edited.

WORKAROUND: Open the View in Connect and re-save it (No changes are needed). After that either close and reopen the Dashboard or enable Auto-Update.

Item 4

Authentication issues when accessing a dashboard with a User's personal API Key. Dashboards leveraging the newest dashboarding experience, by default, utilize restricted tokens when generating links for sharing.

WORKAROUND: Utilize a restricted token when sharing a Minitab Connect Dashboard. Restricted tokens can be created for legacy dashboarding experiences using the "Key(s)" tab when navigating the dashboard within the Minitab Connect interface.

4. Problems Resolved in Minitab Connect 7.9.1

The following issues are resolved in Minitab Connect 7.9.1

- Could not drag to reorder data process rule (187393)
- Issue opening Connect view via the MSS web app (187439)
- Better handling Save as Export with file directories (186799)
