1. New Features in Minitab Connect 7.9.2

2. Maintenance Items in Minitab Connect 7.9.2

- Page Selector
 - o Introduced a new control allowing for dashboard viewers to navigate to alternate pages.
- Rest API
 - o Introduced a new authentication method ensuring API keys/tokens formatting.
- Performance Enhancements
 - o Optimizations done to the way subscriptions return prepared data after the initial transformations have been rendered at least once.

3. Known Problems and Workarounds

Item 1

When using the Safari internet browser in combination with having the “Monitor User” role, your session may be logged out unexpectedly. (229698)

WORKAROUND: Use the Chrome or Edge internet browsers with this role.

Item 2

When in Preview Mode if there is one categorical slicer on the dashboard with a very high number of levels, any other categorical slicer will not be able to open the dropdown menu until a selection is made on the first slicer.

WORKAROUND: Set a preset in Edit Mode before entering Preview Mode. In this case, all options will still be present on the right-side options pane before entering Preview Mode.

Item 3

Occasionally on larger Dashboards with many Views, some of the Views may not load in correctly when opening the Dashboard or during an Auto-Update. New Assets cannot be created using those Views and any Assets associated with them cannot be edited.

WORKAROUND: Open the View in Connect and re-save it (No changes are needed). After that either close and reopen the Dashboard or enable Auto-Update.

Item 4

Authentication issues when accessing a dashboard with a User's personal API Key. Dashboards leveraging the newest dashboarding experience, by default, utilize restricted tokens when generating links for sharing.

WORKAROUND: Utilize a restricted token when sharing a Minitab Connect Dashboard. Restricted tokens can be created for legacy dashboarding experiences using the "Key(s)" tab when navigating the dashboard within the Minitab Connect interface.

4. Problems Resolved in Minitab Connect 7.9.2

The following issues are resolved in Minitab Connect 7.9.2

- Better UI behavior for multi select input (187386)
- Unable to trigger the Custom Field type triggers under certain conditions (187526)
- Better UI behavior on saving MFI with data duplication (253293)
- Resolved various typographical errors in connector export panel (170769)
- Fixed parsing issue with the filter in MySQL connectors (267304)
- Unable to add body and attachment through export via Gmail connectors (267733)
- Default the import format to "Email Only, Ignore Attachments" when setting up Gmail connectors (267952)
- Not able to add new Live Analytics in Connect when worksheet failure occurs (187483)
- Better support importing data to tables with Multi-Column Index through a from/to flow (268424)
- Unable to create a MySQL/MsSQL/Redshift/Postgres connector table through "skip to SQL" (268582)
- Survey Monkey connector record limitation fix (268829)
