1. New Features in Minitab Engage 6.5

Viewing Managed Data in Projects

With Engage 6.5, data architects can now connect managed data to forms so users can view this data in their individual projects.

Geographic Deployments

Minitab Engage can now be deployed to different regions across the globe.

2. Problems Resolved in Minitab Engage 6.5

The following issues are resolved in Minitab Engage 6.5.

- The Unit field is active in the text formula. (250809)
- The Workflow Reviewers category incorrectly appears in the Data Connection Setup dialog. (250875)
- The default Duration (Less Days Paused) formula must be updated to include non-Workflow projects. (239225)
- The dashboard Trend Summary of a Managed Data Table, with dates, incorrectly assigns rows to months. (186924)
- A project can crash when viewing a specific process map. (186680)
- The desktop app crashes when viewing a map with a shape variable after renaming the variable on a form. (186340)
- After an unexpected shutdown, the Recovery File does not contain the user’s latest work. (178604)
- Emails for Due/Overdue tasks are not sent for non-Workflow projects. (240935)
- An incorrect dialog label appears when connecting a Data Entry Table to a Data Table. (186028)

- The Is/Is Not form name has capitalization issues in the German translation. (234815)
- Extra colons are shown in the Japanese translation of the 8D templates. (237836)
- There is an extra choice in the Current Phase list field, PDCA – Execute. (186633)
- The 8D Internal Report data tables do not have conditional filters. (241897)
- Workflow email notifications are off by default in Chinese subscriptions. (225928)
- The sandbox cannot be accessed. (187265)
- The Field ID is incorrectly labeled as Type. (213494)
- A size-limit message appears when a user copies or pastes an image from an Excel chart into the Engage rich text box. (186797)
- Buttons at the bottom of the filter dropdown menu are cut-off in German subscriptions. (195932)
- Hovering over the Workflow icon in the sandbox opens an English tooltip in non-English subscriptions. (225957)
- Formulas with two non-breaking spaces cause an error in Fill Out mode. (249945)
- When a CSV file has a row with the wrong number of columns after the first row in the file, an exception will occur during upload. (250093)
- The application crashes when opening a process map tool template. (231166)
- The Prompt field in the Edit Call to Action dialog is not translated in non-English subscriptions. (242059)
- The "Ready for My Review" filter incorrectly shows the rejected idea/project phase for the user who rejected it. (182016)
- An error shows when selecting any tab in the sandbox. (252592)

3. Known Problems and Workarounds

Item 1

Creating team members from Address Book on the Team Members & Roles form does not support 64-bit Outlook. (180074)

WORKAROUND: Enter team members manually.

Item 2

Exporting a process map to PDF might crash if the text is bold or italic. (182872)

WORKAROUND: Remove bold and italic formatting before you export to PDF.

Item 3

The desktop app might crash when there are many large images in a Rich Text Box on a form. (182323)

WORKAROUND: Divide the images up among multiple Rich Text Boxes.

Item 4

The Monte Carlo Simulation's "Edit Model" page opens and performs slowly when there are many equations in the model. (182400)

Item 5

Using the calendar's date picker when the regional setting's date format does not follow the western calendar results in the wrong year. (182136)

WORKAROUND: Manually type the date instead of using the date picker.

Item 6

Exporting value stream maps to Word, PowerPoint, or PDF produces an error when a non-process shape exists to the right of the rightmost process shape. (181451)

WORKAROUND: Turn off the Takt Time box or move all non-process shapes to the left or below the rightmost process shape.

Item 7

Copying items on a form when using Remote Desktop causes the application to crash. (178344)

Item 8

On a form, adding a row below an optional section in a layout table causes the application to crash. (182384)

Item 9

The spell checker does not work for non-English default dictionaries in forms and brainstorming tools. (178764)

Item 10

On process maps and value stream maps, when the fill of a shape is a color and the font is set to white, the text is not visible in edit mode. (183145)
