## 1. Maintenance Items Completed in Real-Time SPC 7.9.1

The following maintenance items were completed in Real-Time SPC 7.9.1.

- Optimized Loading Times for the Process Quality Snapshot (PQS)
  - The Process Quality Snapshot (PQS) will now have faster loading times for stations and sampling plans containing more than 5 measures, along with optimizations for control chart, capability analysis, and pareto chart loading speeds when multiple days' worth of data has been requested.

## 2. Problems Resolved in Real-Time SPC 7.9.1

The following issues are resolved in Real-Time SPC 7.9.1

- SMS Daily Rate Limit may be triggered early in some cases. (261564)
- X-axis labels only changed on one chart when previewing limits. (137419)
- Changing X-axis label in subgroup edit pane after previewing limits can cause "Invalid Data" message. (261547)
- External ID gets duplicated with component. (260480)
- "Flagged point" UI in the right panel doesn't get updated right away when editing a point. (239234)
- Product-Process-Sampling Plan: Defect row disappears in Collection Details when counter-select all the defects. (232517)
- SPC Stations folder visibility issue. (260279)
- Truncating automatic data collection table prevents new data from importing. (212062)
- Creating station data table may encounter issues due to insufficient validation. (263156)
- Daily Summary flow missing in some cases. (264355)
- PQS: wrong chart with interactions of changing X-Axis label and Preview. (264528)
- Changing X-axis label in "Advanced options..." pane after previewing limits can cause "Invalid Data" message. (264698)
- Measure with No Control Chart can cause issues. (265002)
