

# Workspace Deployment

Minitab wants to ensure that you get the most out of your Workspace implementation. To this end, we have created a deployment path to serve you better. Our in-house consultants will work with your team to help you hit the ground running with Workspace – so you can achieve success even faster.

## The Elements of Workspace Deployment:

### 120-minute Practitioner Training

**Goal:** The Minitab team will show your practitioners how to fully utilize Workspace.

**What We Will Do for You:** We will introduce what Workspace is, demonstrate how to navigate and use the solution, and familiarize your practitioners with project roadmaps and tools. We will also introduce help and support options.

### 120-minute Configuration Training

**Goal:** The Minitab team will teach the essentials of configuring projects and tools.

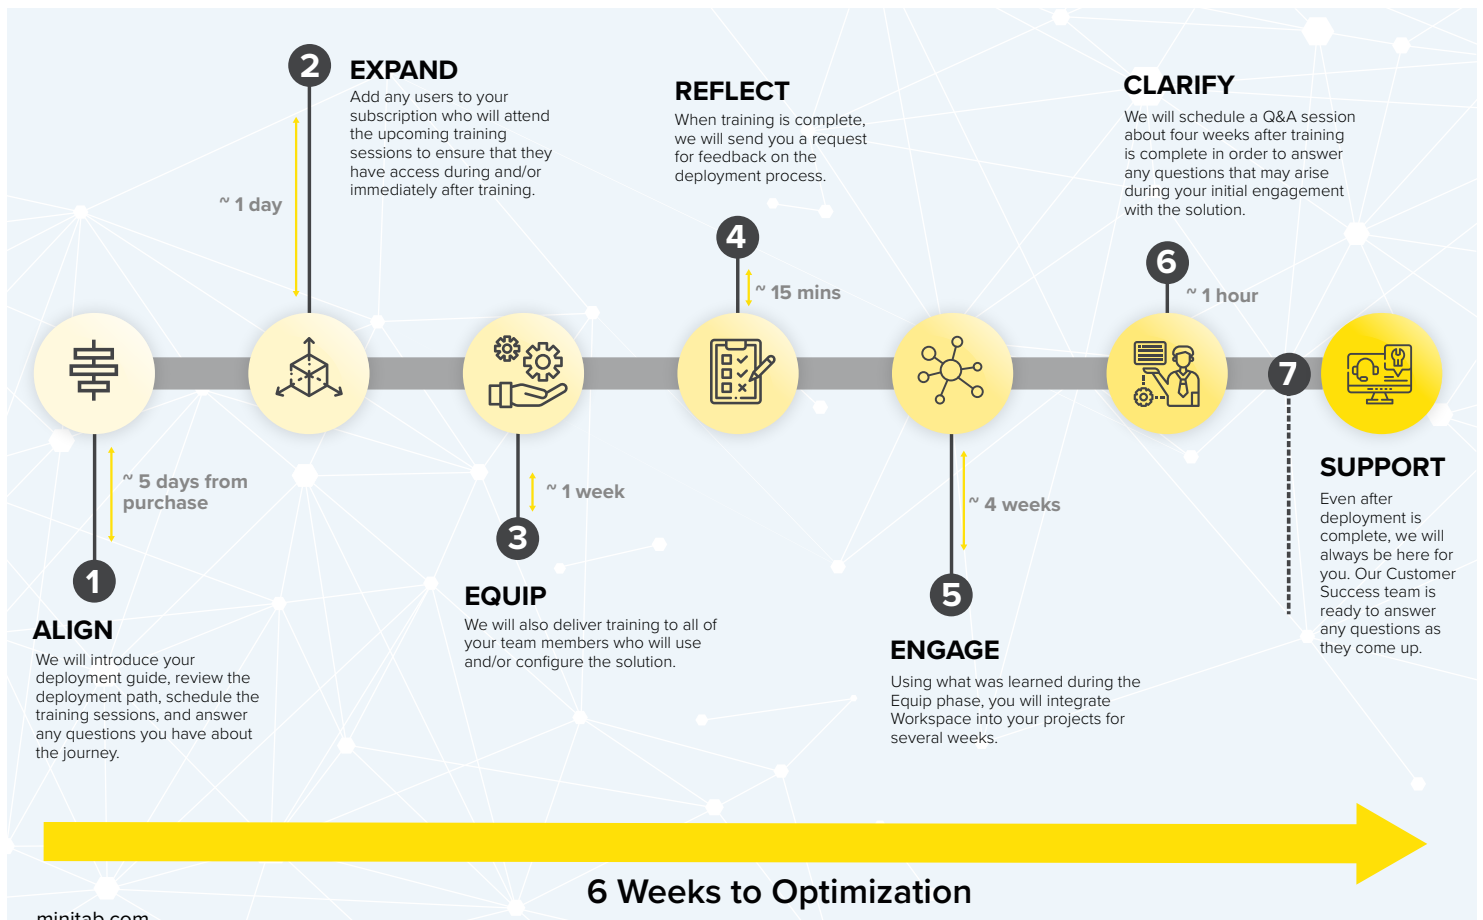

**What We Will Do for You:** We will build a foundation by introducing important features within project and tool templates such as data fields, form configuration and connection, and filtering options.

### 60-minute Follow-up

**Goal:** The Minitab team will provide continued support for users.

**What We Will Do for You:** The content will vary from customer to customer.

\*As an optional addition to deployment, Minitab can configure elements of your Workspace environment for your specific organizational needs. Discuss with a Minitab team member to learn more.
